Art Unit: 3747

Claims 10-11 and 13 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 5.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-4, 6, 12-14, 16-17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki in view of Peppel.

Suzuki teaches a card battle game wherein the battles occur in stages and each character card increases its power by virtue of winning battles at lower stages. Suzuki does increase the power of an individual card available during later battles which increases the battle power of the character in the next battle sequence.

Peppel teaches the use of ETC's in adventure games wherein such created ETC's can function to augment a particular character/card or may be used as proof that a player has achieved a level of play in the game (such as winning a previous battle (see column 11, lines 4-15).

Secondly, it should be noted that "a predetermined number of times (victories)" could be one time and a "certain stage" could be any stage, thereby making these limitations taught by Suzuki.

Finally, Peppel also teaches sets of cards that differ from each other and teaches the use of an external computer medium to store information.

It would have been obvious to modify Suzuki by using additional cards to signify the additional power created by previous character victories as suggested by Peppel because the latter specifically suggested that his system would be useful in an adventure or war game environment.

Claims 5, 7, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki and Peppel as applied to claim 1 above, and further in view of Matsuno.

Matsuno teaches the use of "enable flags" by a control device in order to reference stored information from a data storage area.

Since this was a standard information retrieval technique, it would have been obvious to use this method to retrieve information in Suzuki.

Claims 15 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20 and 21 are allowed.

Applicant's arguments filed June 8, 2005 have been fully considered but they are not persuasive. In particular, the applicant has argued that Suzuki does not teach the use of cards per se, but this does not mean that the reference does not teach the type of battles used in the applicant's games. Furthermore, Peppel does teach the use of additional cards when the characters reach new levels in the game and such a new

level would be the winning of previous battles. In short, Peppel provides the card battle feature that the applicant says is lacking in Suzuki and teaches using additional cards attached to original cards in subsequent situations. The battles and the increase in character power in later battles are clearly taught by Suzuki.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
